Information for clients No.1

Czech Republic
March 2014

We would like to present to you the new Client Zone service which is part of the main menu on our [website](#).

The client zone serves as a communication channel between our company, AUDITOR, and our clients. Its main advantage is the **sending of large volumes of data at one time** (up to 35 MB, in comparison with e-mail which allows up to approx. 8 MB). Another benefit is that the sender can **check** who downloaded the data from the client zone and when.

In the test period we successfully used the client zone not only in communication with selected clients, but also with authorities. These tests were accomplished most satisfactorily and we therefore offer this feature to all our clients.

How does it work?

After registration and verification, every appointed person from our company obtains **registered access**, just like the person in charge on our part. Files are newly sent and downloaded **using our web server**. All you need in order to use this service is a functioning Internet connection.

The establishment of the client zone is closely related to the planned **paperless accounting** project.

Our clients will be able to **view at any time** the **transactions** entered as well as the corresponding **document** which will be stored in the electronic archive. We will offer you this solution in the course of this year.

Are you interested in sending documents via our client zone, with the possibility of sending large volumes of data protected by a high level of security? If you are then please contact Ms Markéta Šimsová at marketa.simsova@auditor.eu. ■
